Annex 3 – Apply rule to products that match these filters: 118

Installation

The installation of the module can be completed in just a few clicks!
From your Addons account click on the “Order” page then download the module’s zip file that you just purchased. Be sure to choose the file that fits your running version of PrestaShop.

If you are using PrestaShop version 1.6 or PrestaShop Cloud:

1. **In your store's back office**, click on the tab to **connect to PrestaShop Addons**, in the upper right of the page.
2. Enter your login information in the box.
1. **Now all of your purchases will appear directly in your list of back office modules!**
2. After connecting to Addons from your store's back office, click on the "**Modules**" tab in the menu.
3. Look for the name of the module you want, click "**Install**", then configure it.

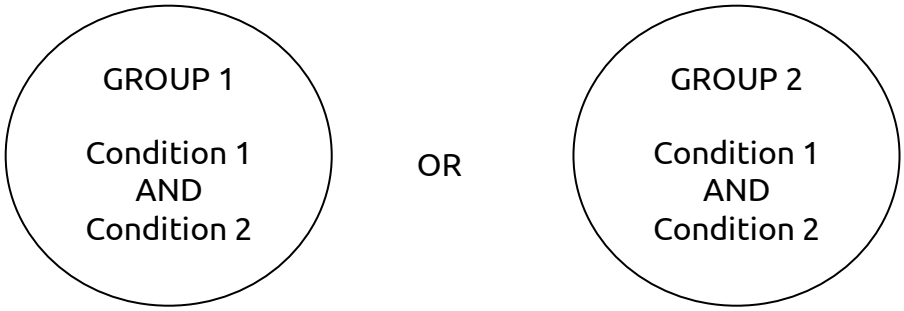
If you are using PrestaShop version 1.5:

1. From your **PrestaShop back office**, click on the “**Modules**” tab.
2. On the top right you will find “**Add a New Module**”, click on it and download the module file that you previously purchased and saved.
3. Finally, click “Install” to begin configuring it.

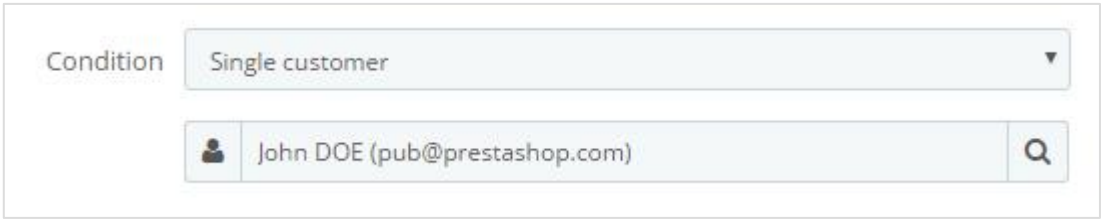
Conditions

Conditions are the facts that must be met to apply the actions. You can create more than one condition into one group, and you can create groups of conditions. All conditions from a same group must be met to considered it as passed, and any group of conditions must be me to apply the actions.

So conditions inside a group have an AND relation and groups have an OR relation.

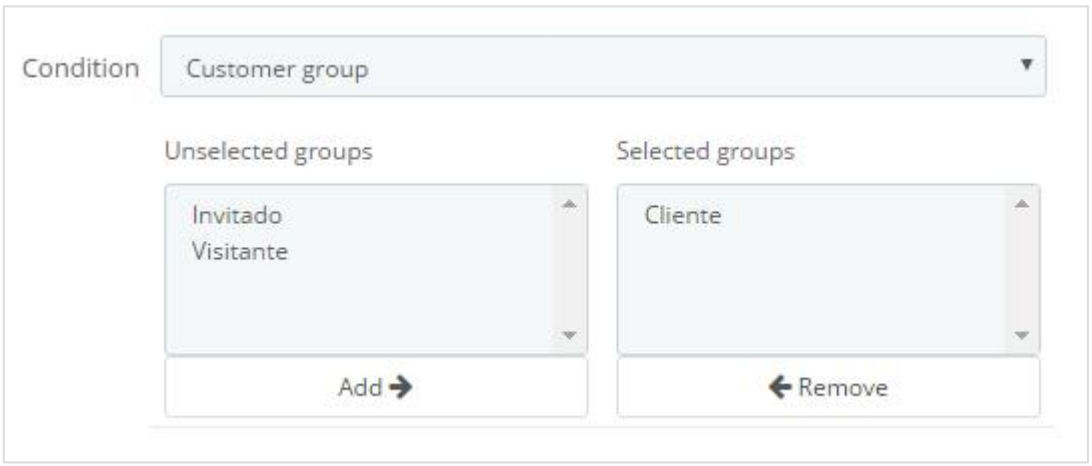


Customer - Single customer



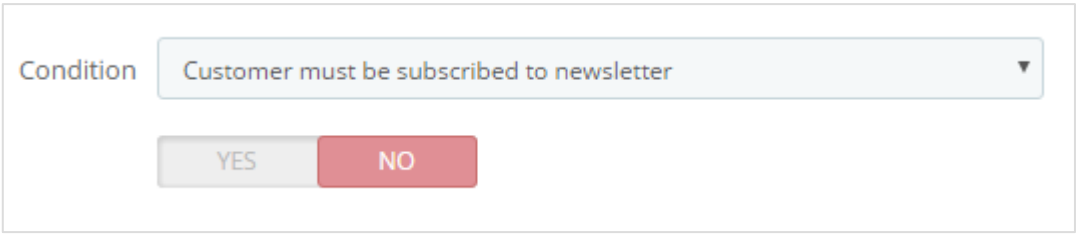
This rule will only be applied to the selected customer. You can add as many customers as you need, in different conditions.

Customer - Customer group



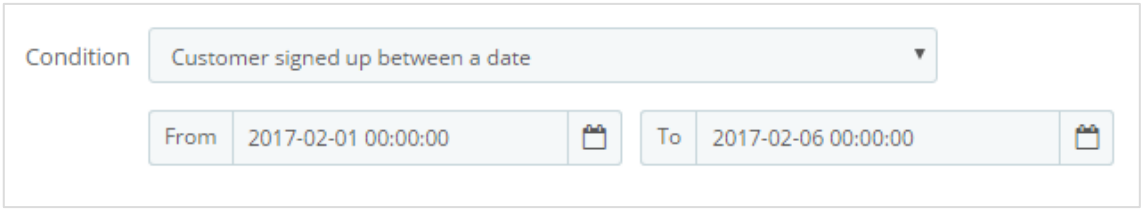
This rule will only be applied to the customers that belong to “Selected groups”.

Customer - Customer must be subscribed to newsletter



This rule will only be applied to the customers subscribed, or not subscribed, to the newsletter.

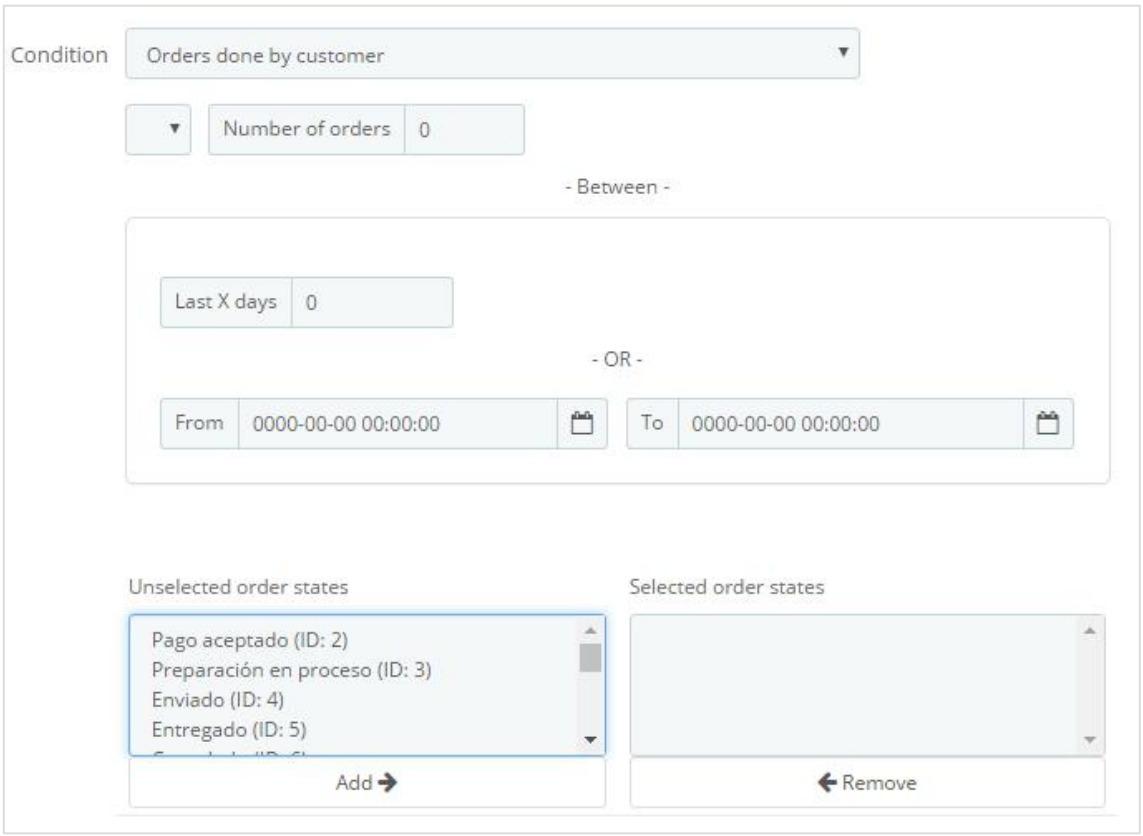
Customer - Customer signed up between a date



This rule will only be applied to the customers that signed up between those dates. If you do not define a “From” date, it will be considered from the beginning of times. If you do not define a “To” date, it will be considered until now.

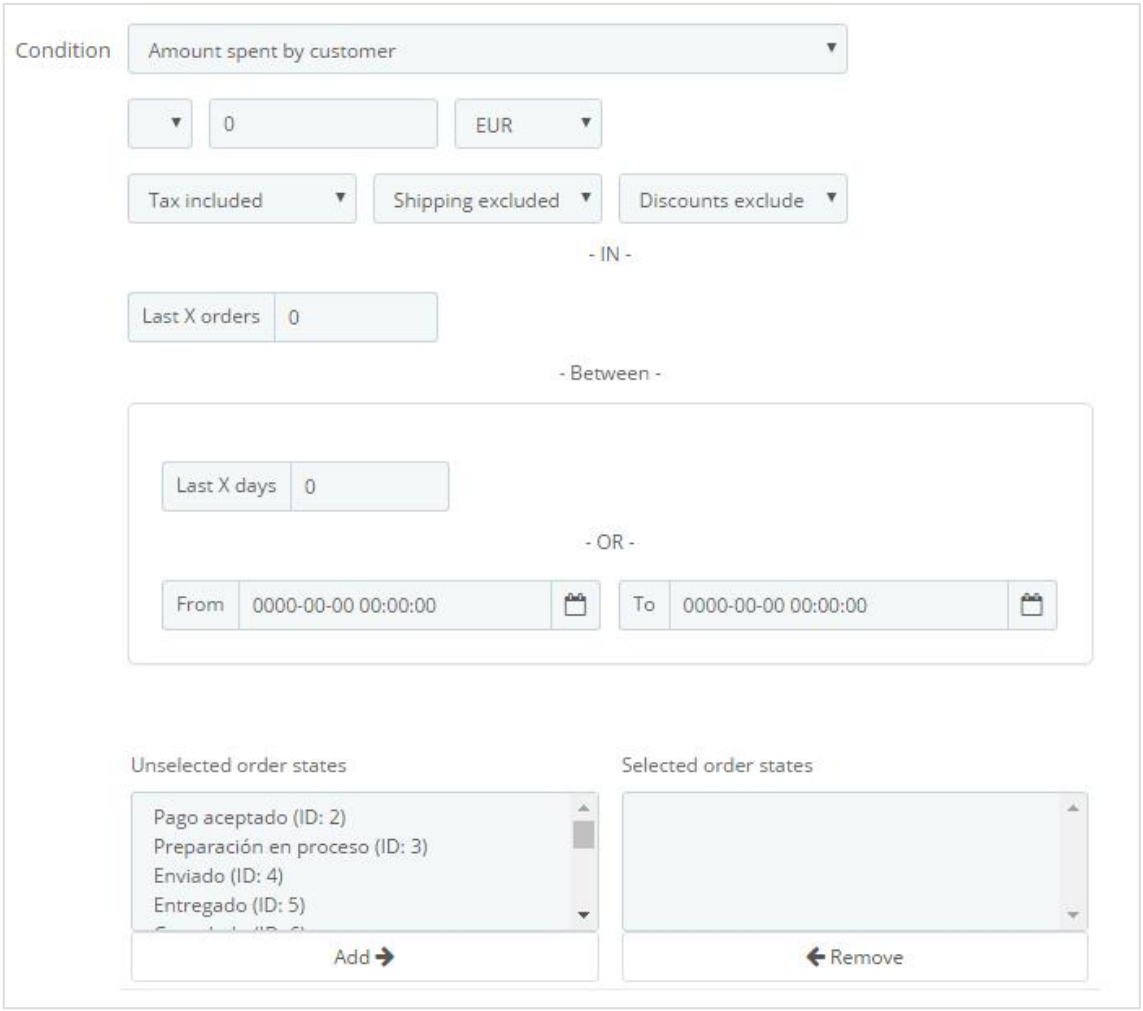
You can also apply the rule to customers that signed up X days before now.

Customer - Orders done by customer



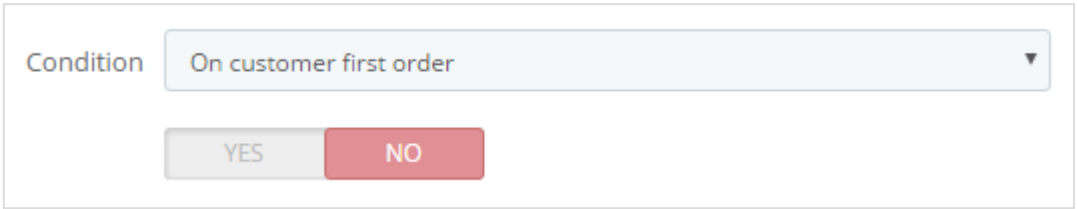
This rule will only be applied to the customers that have done more than, equal or less than X orders, between last X days or between a date interval. It is required to define a number of days or a date interval.

Customer - Customer and amount spent



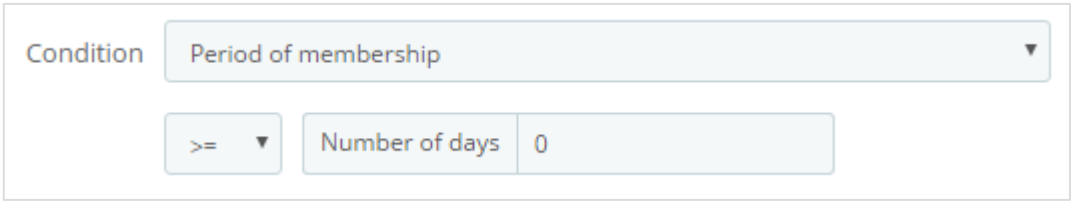
This rule will only be applied to the customers that have spent more than, equal or less than X amount, considering (or not) tax and shipping, between last X days or between a date interval. It is required to define a number of days or a date interval.

Customer - On customer first order



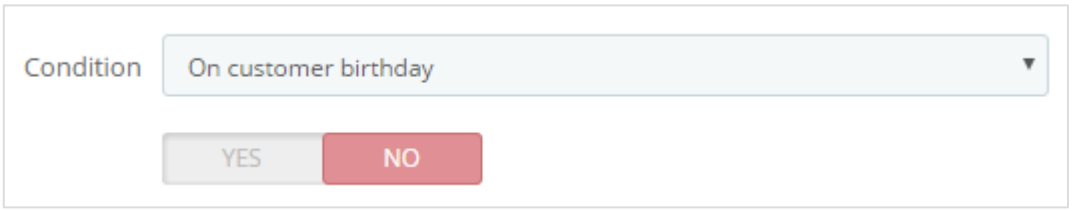
This rule will only be applied (or not) to the customers first order.

Customer - Period of membership



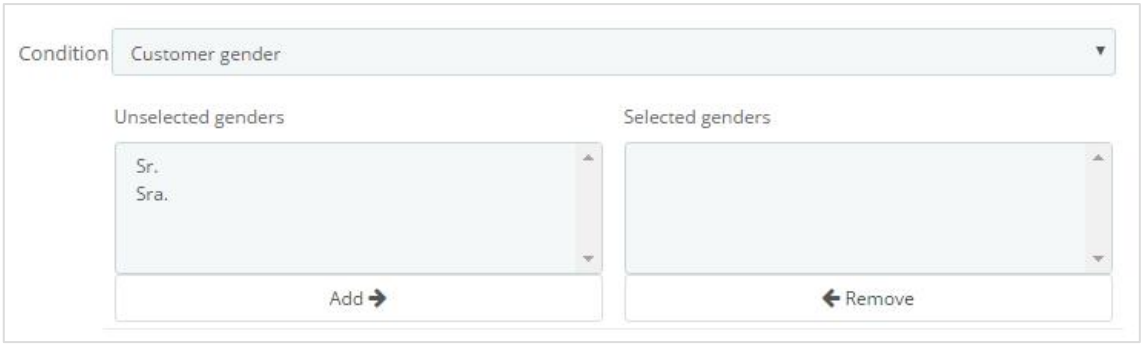
This rule will only be applied to the customers that signed up more than, equal or less than X days.

Customer - On customer birthday



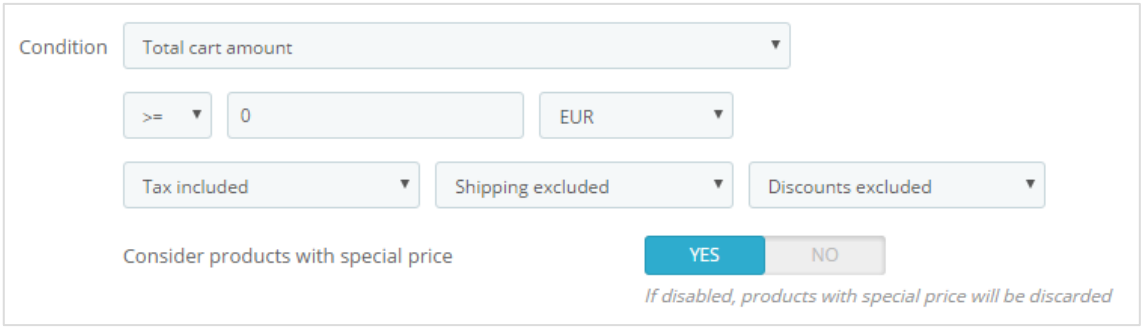
This rule will only be applied on the customers' birthday (or not)

Customer - Customer gender



This rule will only be applied to the customers with the genders selected.

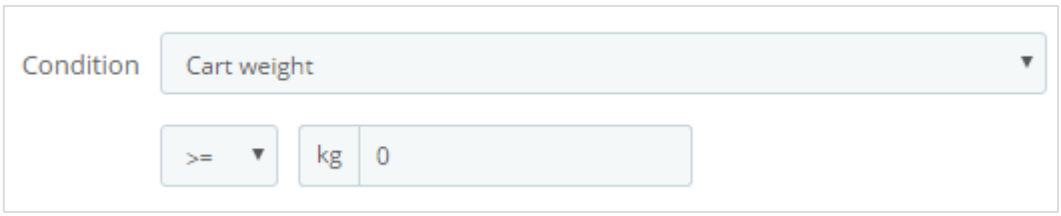
Cart/Products - Total cart amount



This rule will only be applied if the cart amount is higher, equal or lower than the amount defined, considering tax, shipping and discounts.

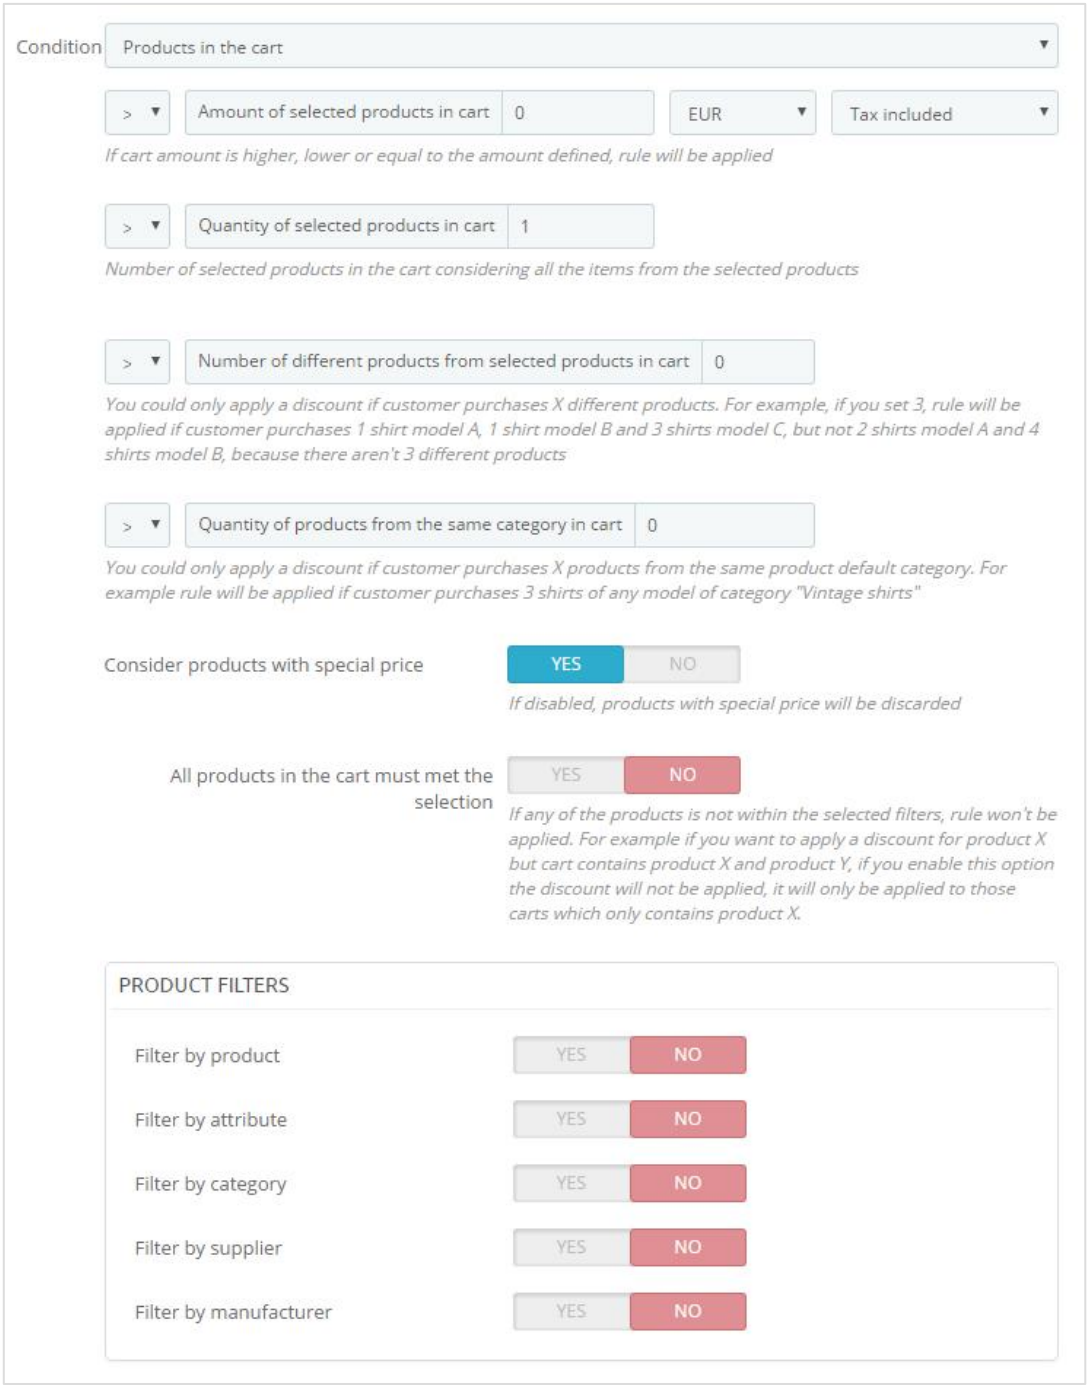
You can also exclude products with special price from the computed amount.

Cart/Products - Cart weight



This rule will only be applied if the cart weight is higher, equal or lower than the weight defined.

Cart/Products - Products in the cart

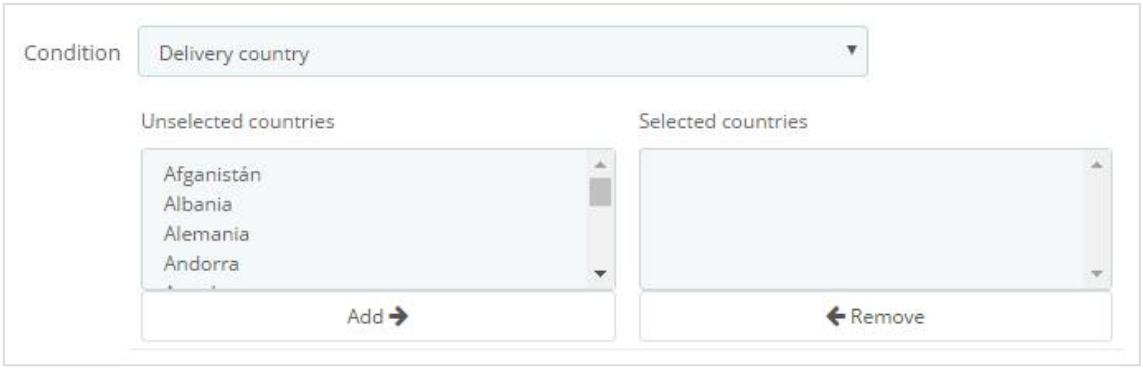


This rule will only be applied if amount of selected products is higher, equal or less than amount defined.

You can also define that this rule will only be applied if the cart has more than, equal or less than the products defined and/or more than, equal or less than X different products. You can also define that products must be the same, or even that they have to have the same attributes.

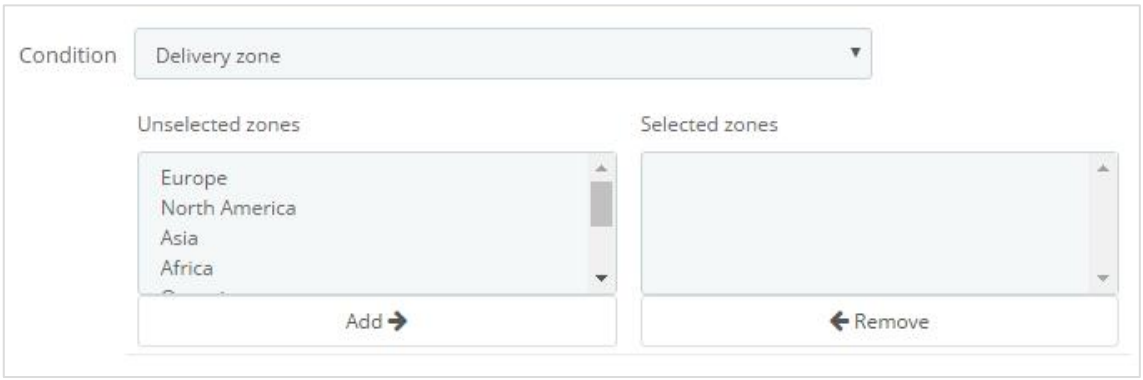
Apart from that, you can also filter by category.

Cart/Products - Delivery country



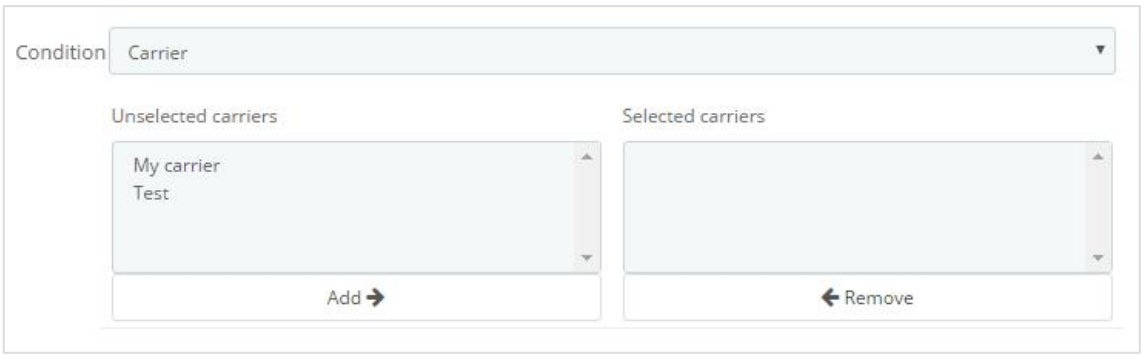
This rule will only be applied if the country of the delivery address is within the selected countries.

Cart/Products - Delivery zone



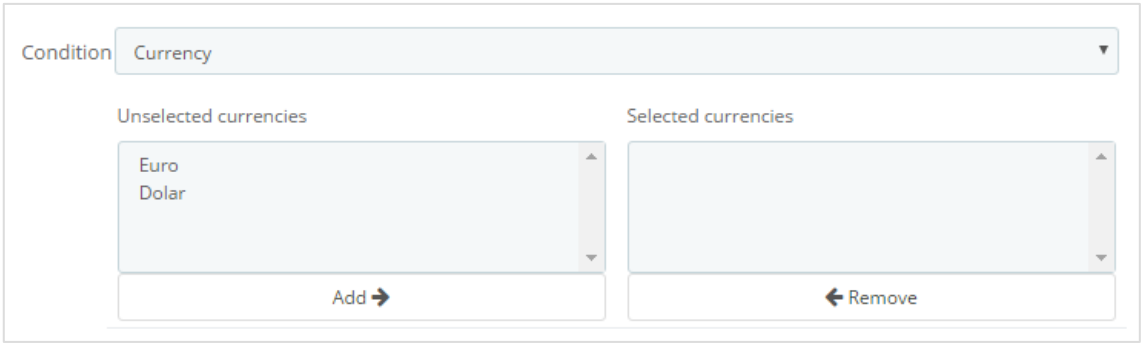
This rule will only be applied if the zone of the delivery address is within the selected zones.

Cart/Products - Carrier



This rule will only be applied if the carrier is within the selected carriers.

Cart/Products - Currency



This rule will only be applied if the currency cart is within the selected currencies.

Actions

If all the conditions are met, the action defined will be applied to the cart.

Shipping cost - Fixed discount

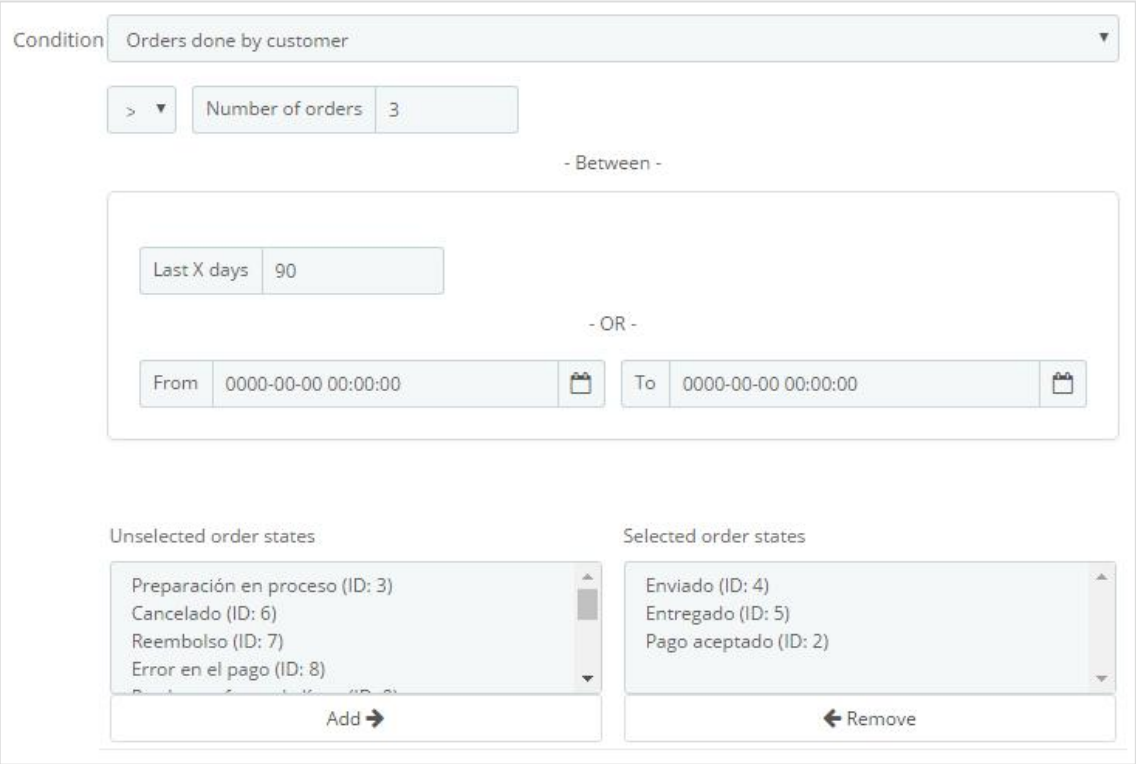
Apply a fixed discount to the shipping cost.

The discount will never be higher than shipping cost.

Example: 2€ off from shipping cost to the customers with 3 or more orders in last 90 days.

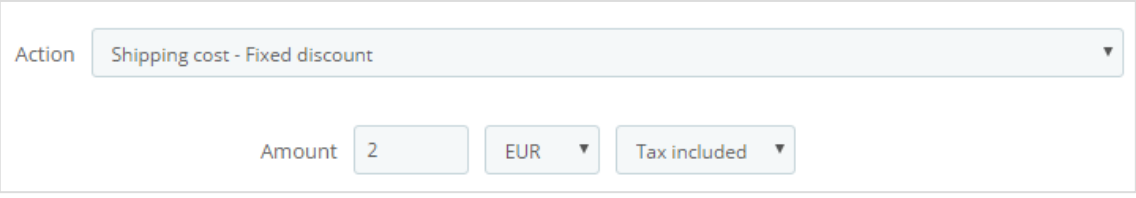
Conditions

1. Select condition "*Orders done by customer*".
2. Define the number of orders and the interval.
3. Define the order statuses that are considered valid.



Actions

1. Select action "*Shipping cost - Fixed discount*".
2. Introduce the amount to discount from the shipping cost.



Shipping cost - Percentage discount

Apply a percentage discount to the shipping cost.

You can define a maximum amount, so the amount computed will not be higher than this.

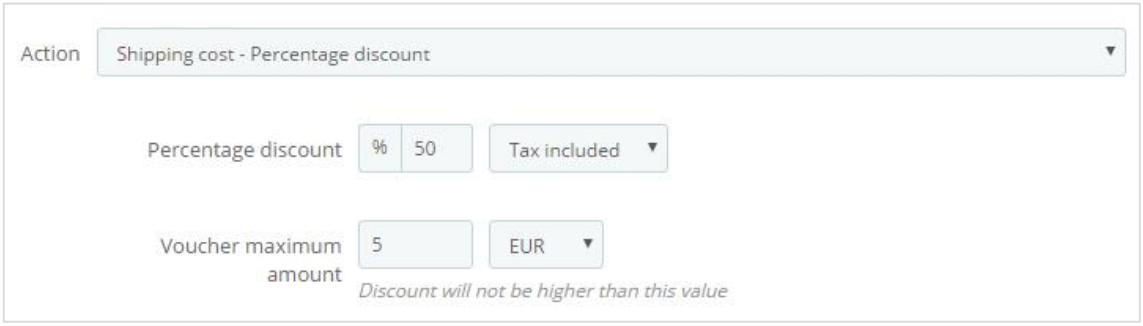
Example: 50% off shipping cost on customers birthday, with a maximum discount of 5€.

Conditions

1. Select condition "*On customer birthday*" and check Yes.

Actions

1. Select action "*Shipping cost – Percentage discount*".
2. Introduce the percentage and the maximum discount amount.



Order amount - Fixed discount

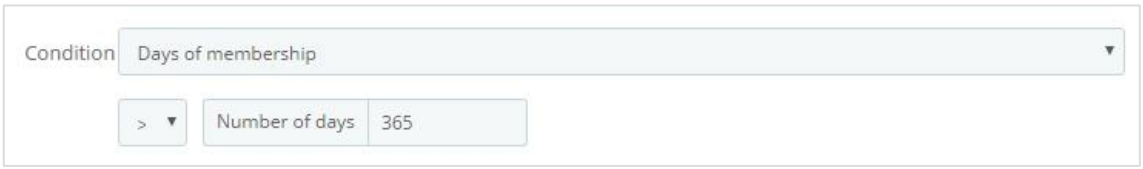
Apply a fixed discount to the order amount.

Define how much you want to discount to the order amount.

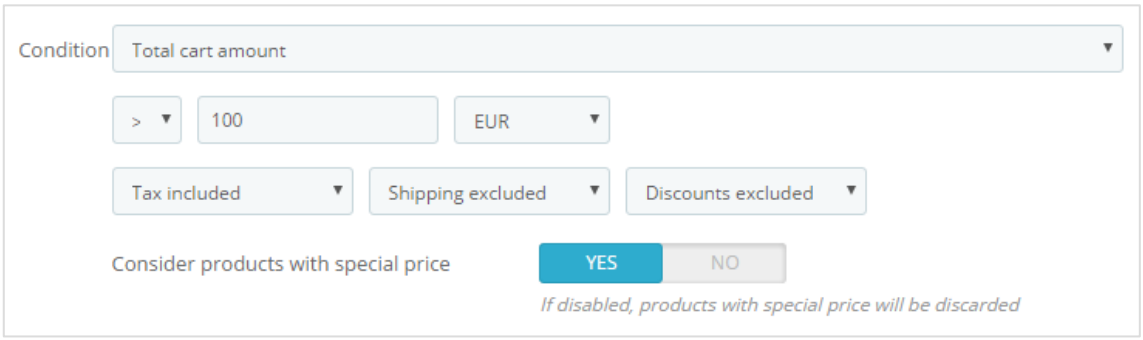
Example: 5€ off order amount to customers registered for more than one year in orders above 100€.

Conditions

1. Select condition "*Days of membership*".
2. Introduce the number of days.

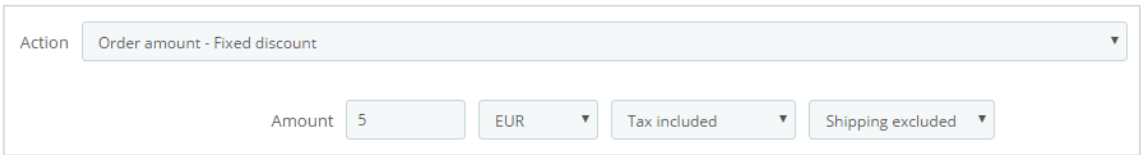


3. Add a new condition clicking the button "*Add new condition*".
4. Select condition "*Total cart amount*"
5. Define the order amount.



Actions

1. Select action "*Order amount - Fixed discount*".
2. Introduce the amount and the rest of conditions.



Order amount - Percentage discount

Apply a percentage discount to the order amount.

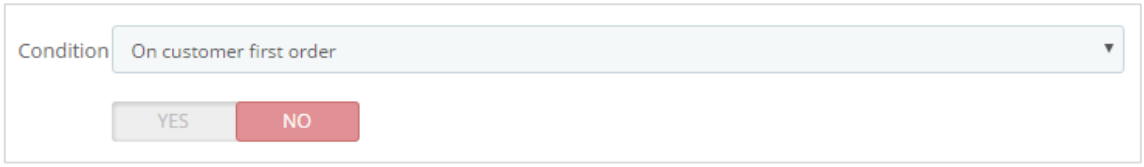
Define the percentage from the order amount that you want to discount.

You can define a maximum amount, so the amount computed will not be higher than this.

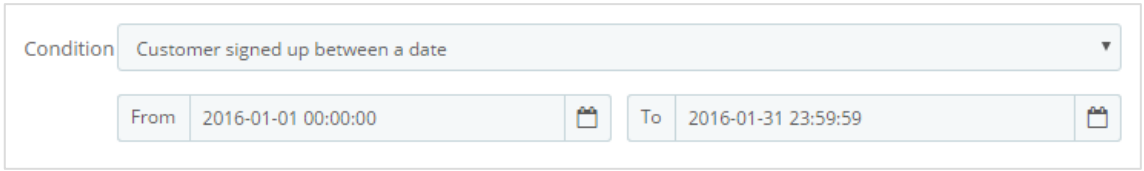
Example: 10% off the first order to all customer registered during January 2016.

Conditions

1. Select condition "*On customer first order*" and check Yes.

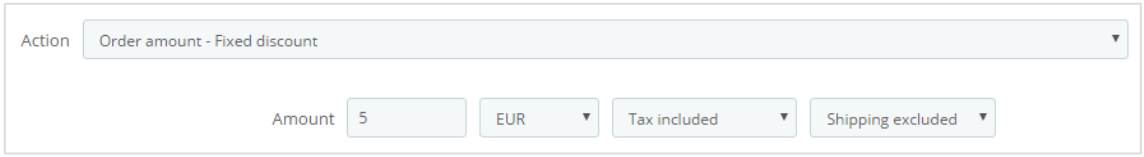


2. Add a new condition clicking the button "Add new condition"
3. Select condition "*Customer signed up between a date*" and define the date interval: from 01/01/16 to 31/01/2016



Actions

1. Select action "*Order amount - Fixed discount*"
2. Introduce the amount and the rest of conditions.



Buy X units - Get Y units (each M-th) - Fixed discount

Apply a discount each M-th unit: 3x2, 4x3, 6x4, 50% off to the second unit, the second unit for $0.01, etc.

Each X units bought, the Y-th unit will have a fixed discount applied.

- *Group products by*: choose how you want to group the products. See Annex 1.
- *Buy X Units*: Apply the discount to each group of X units.
- *And get Y units of them*: Number of units to apply discount.
- *With an amount discount of*: Fixed discount to apply to each Y unit.
- *Consider products with different attributes as the same product*: Only enabled when you select "*Group products by*" Products. If you enable this option, the same product with different attributes will be considered as the same product. See Annex 1.
- *Times to repeat the discount*: This promotion will be applied, as maximum, the number of times defined.
- *Start discounting products from*: Enabled when you do not select "*Group products by*" Products. Choose how to sort products for applying discounts. See Annex 2.
- *Apply rule to products that match these filters:* Choose the products that you want to apply the discount. See Annex 3.

Example: 3€ off in the second product unit in all the products.

Conditions

Do not choose any condition.

Actions

1. Select action "*Buy X Get Y - fixed discount*".
2. Check Product in "*Group products by*".
3. Introduce 2 in "*Buy X units*".
4. Introduce 1 in "*And get Y units of them*".
5. Introduce the amount to discount in "*With an amount discount of*".
